# FINISH OPTIONS

A true industry disruptor. In a market plagued with products that acoustically under perform, have extended lead times, and come with heavy price tags, Line Systems has been introduced in North America to change everything. Our focus has been to enhance production quality, lead times and aesthetics without compromising design or features.

We have created a solid distribution network with quality installation of our products. International partnerships have been developed in multiple countries across the world while the headquarters remain in Brussels.

**3-4 - ALUMINUM EXTRUSION FINISHES**

**5-6 - SOLID PARTITION FINISHES**

**7-9 - TEXTILE FINISHES**

**9-10 - CHEMETAL FINISHES**
